Commissioner for Patents

See attached Notice of Non-Responsive Amendment (37 CFR 1.111).

William L. Miller
Primary Examiner
Art Unit: 3677

Response to Amendment

1. The reply filed on 08-11-2006 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Regarding new independent claim 42, the applicant states "Applicant respectfully submits that new claims 40-42 are patentable over the cited art for at least the same reasons." This statement is insufficient per 37 CFR 1.111 as the reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, the "at least the same reasons" which the applicant is referring to are unclear. The start signal generation being restricted to the mail carrier having the key, the divider material being at least partially transparent to UV radiation, and the communicating to the recipient of the mail represent three previously stated reasons for allowance by the applicant. However, none of these reasons are recited or required in new claim 42.

2. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L. Miller whose telephone number is (571) 272-7068. The examiner can normally be reached on Tuesday-Thursday.
